Software engineer with 3+ years building web, mobile and AI products end to end. Ships LLM agents, RAG pipelines and MCP servers on top of strong full-stack foundations (TypeScript, React / React Native, Node.js) and data-heavy backends (Elasticsearch, MongoDB, PostgreSQL). Currently runs three self-built products in production: CTRBuddy, Study Time and Aevo.

Skills

Languages: TypeScript, JavaScript, Python, Java, C#, PHP, SQL
Frontend & Mobile: React, Next.js, React Native (Expo), Redux, React Query, Tailwind CSS, Angular
Backend & APIs: Node.js, GraphQL, REST, Django, Supabase, Convex, Stripe
Data & Search: PostgreSQL, MongoDB, MySQL, SQL Server, Elasticsearch, Prisma
AI & LLMs: AI agents & tool calling, RAG, MCP servers, LLM APIs (OpenAI, Gemini), LangChain, image & video generation models, TTS / STT, prompt engineering
DevOps & Automation: Docker / Docker Swarm, AWS (S3), CI/CD, Linux, Bash, Git, n8n, web scraping

Relevant Experience

Founder & Software Engineer — Independent

Dec 2024 — Present

TypeScript, Next.js, React Native (Expo), SwiftUI, Node.js / Express, Convex, Supabase, S3, OpenAI, Gemini

- Built and launched three products solo: CTRBuddy (AI SaaS), Study Time and Aevo (iOS apps), owning architecture, backend, mobile, AI, payments and App Store releases.
- Built shared AI systems with LLM orchestration, RAG over user content, credit metering and background generation jobs.
- Grew Aevo organically to 1,000+ monthly active users and about $2,000 MRR, with no marketing spend.

Dahbi Group — Full-Stack Engineer

Jul 2024 — Jan 2025

React, React Native, TypeScript, Python, Django, AWS, Docker Swarm

- Led development of Jimmy's Fitness management platform, supporting operations and members across a chain of four clubs on web and mobile.
- Built QR-code door authentication for member entry at every club.
- Developed React / React Native / TypeScript apps on Django APIs with React Query, Zod validation and token-based authentication.
- Created a shared component library and shipped FlashList performance, themes, accessibility and multi-language support.

AI Wolves Inc. — Full-Stack Engineer

Oct 2023 — May 2024

TypeScript, Node.js, GraphQL, React, Redux, MongoDB, Elasticsearch, Stripe

- Core engineer on MobTwin, a market-intelligence platform tracking millions of mobile apps. Built its data ingestion, search, frontend and billing layers.

Datacium — Frontend Developer Intern

March 2023 — Sep 2023

JavaScript, React, Tailwind CSS, Node.js, Google Maps API, Chart.js

- Built the React frontend of a real-time transport management platform with live GPS vehicle tracking and interactive Google Maps routing.
- Added Chart.js dashboards to help operations teams monitor fleet trends and performance.

Projects

MobTwin — Mobile App Market Intelligence

Built at AI Wolves · Node.js, GraphQL, React, MongoDB, Elasticsearch

- Built a platform that continuously tracks rankings, updates and performance metrics for millions of apps on Google Play and the App Store, serving real-time trends and insights.
- Delivered sub-second search across millions of app records with Elasticsearch, tuning relevance for app discovery.
- Scaled data ingestion horizontally with coordinated Node.js worker processes for scraping, indexing and analytics workloads.
- Ran MongoDB replica sets for high availability and set up automated CI/CD pipelines

CTRBuddy — AI agent SaaS for YouTube creators · ctrbuddy.com

TypeScript, Next.js, Convex, LLM & image-generation APIs, MCP

- Built an AI agent that takes creators from video idea to script to finished thumbnail in one chat, including conversational editing of background, lighting and text.
- Implemented Channel DNA: turns a YouTube channel's reference videos into a reusable style profile and uses RAG over indexed video transcripts to write hooks and scripts in the creator's own voice.
- Added identity-consistent personas from reference photos, reference-guided compositions, and an AI scoring tool that rates thumbnails on virality, clarity, idea, curiosity and emotion.
- Shipped a remote MCP server (Streamable HTTP) so users of Claude, Cursor, VS Code and Codex can generate thumbnails from their own agents, with browser-based authorization, read/generate scopes, per-connection daily credit limits, automatic refunds on failed calls and expiring personal access tokens.
- Built the backend on Convex (serverless functions, real-time sync) so long-running generations continue in the background and the product scales without managing servers; launched with three credit-based subscription tiers.

Study Time — AI study app that unlocks screen time · App Store

iOS · Expo (React Native), TypeScript, Convex + vector search, SwiftUI native modules (Screen Time APIs), LLM APIs

- Turns students' own material — PDFs, documents, images, audio recordings and YouTube videos — into AI-generated quizzes and flashcards.
- Built an AI tutor chat grounded in the uploaded material through RAG on Convex vector search, for follow-up questions and deeper explanations.
- Wrote custom SwiftUI native modules for device-level blocking of distracting apps, unlocking earned screen time only after a study session, with a live countdown and an emergency unlock.
- Rebuilt the app from scratch for v2.0 (Apr 2026), localized it into 6 languages and added a share extension for importing material from other apps.

Aevo — AI image & video studio · App Store

iOS · Expo (React Native), TypeScript, Node.js / Express API, Nano Banana, Seedream, Seedance, Kling

- Launched (Aug 2026) an all-in-one generative studio: text-to-image, image-to-video, motion control, face swap, video editing, templates and trending effects.
- Built a custom Node.js / Express API that orchestrates leading image models (Nano Banana, Seedream) and video models (Seedance, Kling) behind a single credit-metered interface.
- Monetized with weekly, monthly and yearly subscriptions plus credit packs; reached 1,000+ monthly active users with fully organic growth.

Education

Faculté des Sciences, Université Mohammed V de Rabat

Professional Bachelor's in Computer Science — Web & Mobile Applications

Oct 2022 — Jul 2023

Institut de Technologie Appliquée de Khémisset

Specialized Technician Diploma in Software Development

Oct 2020 — Jul 2022

Certifications

Cisco Networking Academy

- JavaScript Essentials
- PCAP: Programming Essentials In Python
- IT Essentials
- NDG Linux Essentials
